EDUCATION

B. Tech AIDS - Sri Eshwar College of Engineering	CGPA : 7.5	2023-2027
HSC- Syed ammal Matric Higher Secondary School	90%	2022-2023
SSLC- Syed ammal Matric Higher Secondary School	Pass	2020-2021

PROJECTS

SafeSight: Women’s Safety Analytics System

SafeSight is an intelligent safety tool designed for women, using real-time monitoring and advanced analytics to detect risks. It identifies lone women at night, women surrounded by men, and recognizes SOS gestures, sending immediate alerts. By analyzing past alerts, SafeSight highlights high-risk areas, empowering users with enhanced situational awareness and proactive safety insights.

SafeLens: Intelligent Visual Safety Filter

Developed SafeLens, an advanced visual filtering tool that enhances screen privacy by detecting sensitive images and automatically blurring the display, Leveraging a custom machine learning model. The project integrates a PyTorch model built on the VGG19 architecture with MediaPipe, enabling precise body pose detection for enhanced content moderation and user safety.

Stock Market Prediction Project

Developed an advanced predictive model for stock market trends utilizing time series analysis. Leveraging statistical techniques and machine learning algorithms, the project analyzes historical stock data to forecast future price movements. This initiative enhances investment decision-making by providing actionable insights and improving the accuracy of market predictions.

ACHIEVEMENTS

Finalist in Smart India Hackathon (SIH) and active participant in multiple hackathons including GeeksforGeeksandUnstop. Contributed to several innovative projects across AI, ML, and full-stack development. Passionate technologist with a strong foundation in backend development and a drive for impactful solutions.

CERTIFICATIONS

Data structures and Algorithms	Udemy	2024
Affective computing	NPTEL	2025
Javascript and php	Udemy	2023
Sql certificate	Udemy	2023
Time series analysis and forecasting	Udemy	2023

SKILLS

Programming Languages: C++, Python, JavaScript, HTML

Frameworks & Tools: Flask, VS Code, GitHub, Google Colab, Canva, Excel

AI & ML: Deep Learning, Machine Learning, Affective Computing

Databases: SQL, mongodb
